ABOUT ME

I am a software developer fascinated by programming, I combine my programming expertise with my analytical skills to present secure, reliable, and user-friendly software solutions to problems.

EXPERIENCE

CEOT Achadona - São Miguel Cabo Verde

IT Support Assistant
Olegário Tavares Educational Complex

I provided technical support to teachers, students, and administrative staff. I was responsible for maintaining and solving hardware and software problems, ensuring the continuous operation of IT systems

Codev
hilton-edeir.github.io/codev/

I created my portfolio to share my works, my side projects and knowledge

Rua Park Principal 2 Achada Monte - São Miguel Cabo Verde

Avelino LDA
https://github.com/hilton-edeir/Avelino-LDA

I created this platform to help a family manage their business by automating all the store processes. They had been keeping all the store selling, stock, and supplier records on paper, and I took the initiative to create a website so they could manage all records, and the clients could now make product reservations and pick them up

Av. Torrado da Silva, 2805-267 Almada

HGO
https://github.com/hilton-edeir/HGH

I went to that hospital due to a serious accident, it took 5 hours waiting due to the poor management of the hospital. I'm creating this platform to improve the information exchange flow between HGO, the patient, and all entities responsible for citizenship documentation, reducing the time some patients wait due to bureaucracy and distributing patients to professionals inside the hospital according to the need.
